This program will provide individuals with training in the following areas:

- Terminology
- Flow of blood
- Universal precautions
- Hand washing rules and techniques
- Finger stick procedures

This is a 17 week program that will consist of classes 2 days per week on Tuesday & Thursday along with a clinical component. Phlebotomy Lab Technicians are allied health professionals who draw blood from patients or blood donors for medical testing. They can also prepare and process blood tests.

Phlebotomists are responsible for explaining the procedure to patients, updating patient records, preparing stains and reagents, cleaning and sterilizing equipment, taking a patient’s blood pressure, pulse and respiration rate, sending urine and fecal samples for lab testing.

This course will also prepare students for the National Certification Exam which is held at our Scranton campus.
